afternoon.

## Women's Institute

The June meeting of the  
Champion W. I. will be held  
in the United Church on Tues-  
day afternoon, the 14th, inst.,  
at 2:30, when Kirkcaldy and  
Carmangay branches will be  
the invited guests in honor of  
the visit of Mrs. J. A. Campbell,  
District Director No. 4. A good  
programme is being prepared,  
which will include Mrs. Camp-  
bell's address, a summary of  
current events, by Mrs. Moffatt,  
a short Health play, musical  
selections, etc. Roll call—Cur-  
rent events. Refreshment con-  
vener—Mrs. P. Dawson.

## Local & General

June 10 is "Fathers Day."

Reserve July 1st, for Champ-  
ion.

Lyman Jopling of Calgary is  
a visitor in town.

Mr. Garrison of Frank is on a  
visit to his daughter, Mrs. R.  
Gardiner.

Miss Jennie Ulston of the  
Holy Cross hospital staff is  
home on a two weeks vacation.

Born—To Mr. and Mrs. Jack  
Steeves, on Sunday, June 5th,  
a son.

\* J. D. Henderson is attending  
the Masonic Grand Lodge in  
Calgary.

Miss Margaret McCartney of  
Vancouver was a guest at the  
home of Mr. and Mrs. Bastin  
during the week.

Mr. Met Larkins is improving  
after an operation at the Holy  
Cross hospital on Tuesday.

Born—To Mr. and Mrs. N. J.  
Patterson, on Tuesday, June 7,  
a daughter. *Constance Jean*.

† Mrs. Johnson of Trochu is vi-  
siting at the home of her daugh-  
ter, Mrs. R. D. Farries.

L. J. Adams was a business  
visitor in Lethbridge this week.

Mrs. Newsome and Mrs. Tom  
Sanderson were tea hostesses  
during the week.

Mrs. W. J. Sanderson had the  
misfortune to step on a nail,  
injure her foot severely.

A whole slab of Bacon (6 lb.  
average) and 3 lbs. of Lard,  
all for \$1.00—Champion Meat  
Market.

Mr. and Mrs. A. Baker left  
for Lethbridge on Wednesday  
where Caroline will take her  
music examinations.

P. Bouysan was unfortunate  
in spraining his ankle while  
playing ball and is confined to  
the house.

Clayton Crane, son of Mr.  
and Mrs. R. C. Crane has ar-  
rived home from a very success-  
ful years work at the Univer-  
sity of Logan, Utah.

The Royal Purple have dis-  
continued their regular meet-  
ings during the summer  
months. Due notice of their  
resumption will be given.

Recent word from Gordon  
McLean, now of Belleville, On-  
tario, states that he attended  
the ball given at the Royal  
York hotel Toronto, in honor  
of the graduating class of St.  
Michael's Hospital. Mrs. Mc-  
Lean's sister, Miss Eileen Kelly,  
was among the graduates.

Nels and Ole Running re-  
turned from a two months soj-  
ourn in the Peace River coun-  
try. They were highly impres-  
sioned with the land, finding the  
crops as well advanced as here  
and farming conditions quite fa-  
vorable. While there they filed  
on homesteads three and one half  
miles from Wanham.

## Former Resident of California Dies in

The death occurred on May  
20, of J. A. Scott Wilson in his  
44th year, at his home in Sierra  
Madre, California.

He was deceased had many  
friends in and around Champ-  
ion, having come to Alberta in  
the spring of 1914 with the Roy  
Graves and C. A. Wright fam-  
ilies. He worked for several  
well known men in the vicinity  
namely, G. E. Smith, L. Thorne  
and later farmed for himself  
near Brooks Alberta.

The funeral was held at  
Santa Ana, his old home town,  
Saturday May 28. Many beau-  
tiful bouquets and sprays gave  
evidence of his popularity.  
More than thirty members of  
the American legion and a  
number of firemen were pres-  
ent at the funeral. Scottie, as  
he was popularly known was a  
member of the fire department  
before coming to Alberta. He  
served in the late war, signing  
up in 1917. The Legion banner  
and flag stood at the head of  
the flag draped casket. The  
American legion had charge of  
the funeral.

Besides his wife, Sibyl, he  
leaves to mourn his loss two  
daughters, Mrs. Henry and Mrs.  
Copeland, and one brother,  
Dunlap, all of Southern Cali-  
fornia.

This brave soldier, who bore  
his burdens so long and with-  
out complaint, was the young-  
est son of J. A. Wilson, for  
many years a judge in Santa  
Ana.

## Come to Champion July 1st

Preparations for a big day  
here on July 1st are well under  
way and the public may rely  
upon one of the best efforts at  
entertainment ever made here.  
The best of music, baseball,  
softball, athletic sports and  
other attractions will be sup-  
plied, finishing as usual with a  
big dance in the evening. In  
addition there will be horse-  
shoe tournament. Special at-  
tention is being paid to booths  
on the grounds, which will sup-  
ply all necessary adjuncts to a  
care free day. Make an effort  
to get to town early, as this will  
be an all day programme.

## Bride-Elect Honored

Complimenting Miss Melba McGill-  
vray, a June bride-elect, Mrs. J. Arch-  
bold, Mrs. J. McHardy and Mrs. J.  
Peller entertained Thursday evening  
at a shower in the home of Mrs. C.  
Cyr. Lilias and tapers to match  
centred the tea table, at which Mrs.  
W. Crawford presided. Miss Rheta  
Campbell and Miss Dorothy Crane  
presented the guest of honor with  
many gifts in behalf of the guests  
who included: Mrs. Freeman, Mrs. G.  
Foster, Mrs. Anderson, Mrs. R. Crane,  
Miss Mitchell, Mrs. Massell, Mrs. J.  
Bennett, Mrs. Bull, Mrs. Bowen, Miss  
Evelyn and Miss Ethel Mitchell, Miss  
Ila, Miss Edna and Miss Dorothy  
Stoddard, Miss Aileen McCullough,  
Miss Sophie Daniels, Miss Janet  
Anderson and Miss Mary Jamieson.

## Farewell Party

Prior to their departure for  
Peace River the families of S.  
Milliken and L. Milliken were  
very of the residents of farewell at-  
tention from friends in the district.  
Over fifty-five guests gathered  
at the home of Henry Frank  
on Sunday to wish them success  
in their new venture. A short  
program and refreshments end-  
ed a very pleasant afternoon.

## Champion Theatre

Wed. June 15th

The love story  
of a modern  
pirate

## 'Corsair'

With

Subscription \$1.50 per year, payable in advance.

ADVERTISING RATES  
Legal advertisement, 15 cents per line for first insertion, 10 cents per line for each subsequent insertion.

Advertisements of Wanted, Lost, Found, Strayed, etc., not exceeding 50 words, 50 cents for first insertion, 25 cents for each subsequent insertion. Commercial rates on application.

THURSDAY June 9, 1932

NOTES AND COMMENT

Investigation has shown that attempts have been made within the last year to stabilize or control the price of certain commodities, as a time when the prices were much higher than in April, 1932. An analysis of the price decline shows that the commodities which governments and other organizations attempted to stabilize or control declined in price an average of 50%, whereas the 14 commodities which had not been stabilized or controlled and which had been left to find their own price level on the open market had only declined 30%. Apparently, therefore, the efforts of stabilization have only ended in startling price downwards at a lower level than would have been the case had the natural price of the product not been interfered with.

These results are exactly in keeping with those that have always occurred in history when attempts have been made to meddle with the prices that result as a consequence of the natural workings of the law of supply and demand. There are definite records available of the details of attempts that have been made to stabilize and control the price of at least 14 commodities during the course of some 4,000 years. The records show that every one of these attempts not only ended in failure, but usually resulted in much trouble and dissatisfaction both to producer and consumer, sometimes in disaster to whole nations, and sometimes in the throwing out of power by the people of the governments that attempted the price control.

It is probable that there are widespread underlying laws that control the course of prices which are far from understanding, and which laws may have their roots deep in the fibres of human nature itself—hence perhaps the reason for the invariable failure of all attempts that have been made to interfere artificially with price levels.

In anticipation of serious grasshopper menace to crops in certain districts south and east of Calgary, the Provincial Department of Agriculture, in co-operation with the staff of the Dominion Entomological Laboratory at the Experimental Farm at Lethbridge, are taking active steps to control the menace.

Thorough instructions for grasshopper control are issued in a special pamphlet prepared by E. H. Strickland of Alberta University, copies of which may be had on application to the Field Crops Branch, Department of Agriculture, Edmonton.

Although the areas chiefly affected lie in the districts south and east of Calgary, it is pointed out that there is possibility of their existence in more central regions of the province, and that it is advisable that all residents in areas which suffered no appreciable damage last year, nevertheless examine likely breeding places in their neighborhood till the end of June. Prof. Strickland also points out that it is most important to discover as early as possible in the season where the hoppers are hatching in the greatest numbers, and to kill them before they develop wings to fly, through the crops. The hoppers that threaten grain crops this year lay their eggs almost entirely in cultivated land that was weedy last summer.

Canada hears Parliament debate many proposals that might help the farmer. The Government, sharply attacked, announces its intention of appointing a commission to go deeply into the whole problem of marketing. Members specify in figures what is hurting the Canadian farmer—Prices the farmer has to accept for what he has to sell have dropped 60 per cent since 1929; prices he has to pay for what he must buy have dropped only 14 per cent.

Fur from five rabbit skins is needed to make a man's soft hat. And still it is the straw hat that keeps jumping off.

# Scientists At Ottawa Suggest That There Be Two Major Divisions Of Geological Time

Standard time consisting of eons, era, subera and periods is the aim of the national committee on stratigraphic nomenclature, Dr. F. J. Alcock, of the geological survey of Canada, chairman, told Section 4 of the Royal Society of Canada meeting at Ottawa.

It is the opinion of the committee that geological time previous to the development of abundant life on the earth's surface is at least as great as geological time from that development until the present moment. The suggestion is that, therefore, there should be two major divisions, and that these be known as "eons."

Seven hundred million years was the estimate of some members of the section of the length of the latter eon, and they thought the former to be much longer. Granite rocks in Manitoba, have been dated to have an age of 2,000,000,000 years.

At the same session a paper by Prof. J. S. Delory, of the University of Manitoba, speculated on the earth's development and composition. The belief expressed was that the crust of the earth consists of heavy, dense metallic substances; that its centre consisted of lighter rocks and that in between lies the great zone of flowage and adjustments. The earth, Prof. Delory stated, is losing heat in exceptionally large amounts from "cerberus" more or less destroyed by the earth's surface. Once, millions of years ago, the escape of heat in this way occurred in Canada; now it is chiefly in the vicinity of the Hawaiian Islands in the Pacific Ocean. Supporting his thesis, Prof. Delory reported that the temperature rises one degree every 400 feet down in the Froid mine of Northern Ontario. In Hawaii the temperature rises one degree in every 50 feet.

How aerial photography has achieved results for geologists which on foot they would have been years in securing was shown by Dr. A. Nichols of the geological survey, who exhibited an unusual series of photographs taken by the Royal Canadian Air Force. In these pictures, taken chiefly in the Athabasca, Great Bear and Great Slave Lake and Arctic areas of Canada, land forms such as faults, dykes, folds, fjords, cinders and beaches (formed years ago) were clearly defined and made it possible to extend for many miles. Some of these were recognized from descriptions given by members of the geological survey as many as 40 years ago.

Further light, of value to miners and prospectors, of British Columbia, was thrown on the body of granite rocks known as the Coast Batholith, which extends 1,300 miles from a point near the international boundary northward and westward into Alaska. The survey work of the geological survey, which began in this area as far back as 1881, has provided additional information year by year. Once it was thought the possibilities of finding valuable deposits were in the one part of the area and in the other. The geological survey is indicating where the prospects are good and where they are not, and that studies, for instance, have shown that mineral deposits occur associated with certain types of rock and the mapping of these areas provides valuable guides.

Authors of papers given were Dr. Forrest Kerr, of the geological survey; Dr. S. J. Schofield, of the University of British Columbia; and Dr. H. C. Gunning, also of the geological survey.

Customer: "I want to look at a few records."  
Military Outfitter: "Yes, sir, Cavalry or Infantry?"  
"Oh, I don't suppose it really matters. It's for wedding-cake."

Quebec's maple sugar crop for 1932, which is roughly estimated at 24,000,000 pounds, is double that of last year, though 6,000,000 pounds under average.

"Did that suit really cost \$6?"  
"Yes, I can show you 15 demands for payment."—Kasper, Stockholm.

W. N. O. 1845

## Living Conditions In Ireland Have Improved

Change For Better Shows Free State Came Into Being

An article by Charles Petrie, in Nineteenth Century and After, says: the general standard of living is decidedly lower in Ireland than in England, and both wireless sets and gramophones are still regarded in the light of luxuries rather than necessities. On the other hand, the farmer's wife and daughters are not trying so hard to be ladies that they have no time to take their share in the work of the farm. Moreover, there has been a great change for the better since the Free State came into being, even where the poorest class of the population is concerned. The crumbling cottages of generations ago have either been repaired or replaced by more modern dwellings, and in their new surroundings the inhabitants have acquired a new self-respect. Heaters are as rare in the Free State as in Fascist Italy, and the Londoner who visits Dublin will find it a most interesting experience for money every few yards along the street. Only in the more remote parts of Galway is the down-at-heel peasant of years still to be seen, for elsewhere he has been replaced by the type of countryman of whom any country might well be proud. Industry, too, is on the decline, possibly for economic reasons.

## Industries In India

Sugar and Cotton Trade Is Showing Big Increase

India continues to prove itself the land of strange contradictions. Despite its own condition, Sir George Schuster, its Finance Minister, finds that India's budget, which is based on a three-year period will show a surplus. Gold sales at a high price explain the satisfactory situation only in part. The sugar industry, for instance, is expanding, 13 important factories being in construction and seven others planned. The cotton mill trade shows large increase. Postoffice savings' deposits are expected to advance one-third this year. A cheerful disposition is made as to where the ready resources lie—the masses show that they have a considerable amount of money available for investment.

## An Ironie Fact

It is somewhat ironic fact that the little village of Bond Head in Eastern Ontario, should be the birthplace of two of the most distinguished Canadians of the generation following the pioneer days, one of whom Sir William Osler, was famous for the contention that men were useless above 60 years of age, while the other Sir William Muttick, has had nearly 30 years of the highest form of usefulness after passing that age and at nearly 90 is still going strong.

## Will Be Great Help

Another little bit of life is reported from England where a scientist has succeeded in splitting the atom. Folks who heretofore have been compelled to use a whole atom at one time and waste part of it can now use half an atom, and be mighty glad of it.

A freshman at Indiana University, taking out a permit to use his car while in residence, found himself confronted with the following question: "Purpose for which car is to be used?" In the blank he wrote: "To ride in."

## Winnipeg Newspaper Union

A FASCINATING MODEL—DOES FOR BEAUTY COTTONS AS WELL AS THOSE OF STURDIER CHARACTER

Nautical blue and white print in sailor, because it is so popular, is chosen by this smart junior. "And don't you think it is effective?" The pointed bodice and tucked at the front to stimulate a bolero are of plain material. It tones with the blue shade.

Other schemes such as yellow and white in pique, striped cotton weaves in red, white and blue with plain white and plain pink sportswear lined with white handkerchief linen dotted in pink used for contrast are admissible.

Style No. 433 is designed for sizes 6, 8, 10 and 12 years. Size 8 requires 1 1/2 yards of 30-inch material with 1/2 yard of 35-inch contrasting and 2 yards of binding.

Pattern of pattern 23 cents in stamps or coin (coin is preferred). Wrap coat carefully.

Some Counter

"My husband is a real prize to the bank," said the boastful wife of a bank clerk. "The way in which he handles notes is truly wonderful; counts them like lightning, without ever making a mistake." "Really," said the friend to whom the statement was made. "Never a mistake at all?" "No—well, at least he is never out more than a few coppers!"

More than \$5,135,000 has been awarded since the inauguration of the Nobel Prizes, which are given to leading men and women for services to literature, science, and international peace.

## Canadian Radio League Officials Regret That Salaried Commission Will Conduct Broadcast System

Noise May Accompany Auroral Display

Possibility Being Studied By Royal Society Of Canada

The question of whether sounds sometimes accompany auroral displays in the sky came in for discussion before section three of the Royal Society of Canada at Ottawa.

Just because the currently held belief as to the cause and nature of auroras does not provide for any sound to be heard, Dr. J. S. Flaskett, director of the astrophysical observatory of Vancouver Island and the holder of the Flavelle medal of the Royal Society of Canada for 1932, thinks that the great body of evidence that sounds have been heard should not be discarded.

He read a paper before the section, prepared by Dr. C. S. Beale, of the observatory staff, in which it was stated that the only interpretation of the observations which seems to fit all the facts is that both the sounds and low level apparitions sometimes reported are real and that they constitute normal though perhaps unusual accompaniments of other auroral phenomena.

"If this is so," it is stated further, "there must be some definite physical process taking place close to the earth's surface which is able to produce the effects that have been observed. The aurora has long been considered to be electrical in origin and the hypothesis that the auroral sounds and low level displays are due to some sort of electrical discharge near the surface of the earth seems a very reasonable one."

Assist Poultrymen

Hon. Robert Weir, Minister Of Agriculture, Promotes Continuation Of Government Aid

Continuation of the assistance given by the government to poultry breeders desirous of securing registered cockerels for their flocks, was announced by Hon. Robert Weir, Minister of Agriculture. The assistance amounts to transportation charges and a sum of \$1.25 per bird toward the purchase price providing the cockerels pass the inspection tests and are shipped in lots of ten or more.

The purchases must be made from bona fide breeders entered under the federal policies of registration or record of performance. There is no restriction to the sale price.

Plenty To Learn

And while on the subject of the excessive expense accounts of our legislators and government officials, let it be observed that members of the British parliament are now allowed only third-class fares when they travel, and even at that the tickets are issued only between London and their constituencies. We've a lot to learn from the old land—Farmers' Sun.

Wealth Hoarded In States

Money estimated to amount to \$1,300,000,000 is being hoarded by Americans in the United States. President Hoover, in a recent appeal for the release of this money, stated that every dollar thus hoarded was equal to "the destruction of from five to ten dollars in credit."

Regret that a salaried commission was to be appointed to conduct Canada's proposed new radio broadcasting system was expressed by officials of the Canadian Radio League, which organization was largely instrumental in the presentation to the parliamentary committee of the basis for the radio policy adopted at the session just concluded. It had been felt by the league that the commission should be composed of voluntary workers, thus ensuring greater freedom from political interference, and constituting a buffer between the government and the operating organization.

A statement was issued by Allan Plamant, honorary secretary, following a meeting at Ottawa at which it was shown that the commission had been named, since its inception 18 months ago, at a total cost of \$5,000, more than half of which, Mr. Plamant said, was contributed by members of the executive.

The league will remain in existence as a "watchdog and friendly critic" of the proposed "Canadian Radio Broadcasting Commission." It was stated, and will branch out with a view to securing more members and a wider organization.

Satisfaction was expressed at the successful conclusion of the campaign directed by the league and at the terms of the Radio bill adopted by parliament, except that it was felt, if salaries were to be paid the commissioners, they should be larger than those provided. The legislation authorized a salary of \$10,000 for the chairman and \$5,000 for the two commissioners.

Grasham Spyr, chairman of the league, said that he and the chairman did not equal what paid other responsible business positions or leading university presidents. The commission would handle as much as \$4,000,000 a year, he said and would be controlling programmes that would be listened to by the whole of Canada for a number of hours a day. Such responsibility should be vested only in men of the highest calibre, and the chairman will be an experienced and responsible man," he said.

Indian Athlete

Native At Fort Chipewyan Makes High Jump Record

Canadian Olympic committee officials seeking point winners for the Los Angeles games might well turn to latent material among Indian tribes in the Northwest Territories if an athlete record in the Royal Canadian Mounted Police annual report is accurate.

According to Inspector H. Royal-Gagnon, a young Indian whom he does not name jumped six feet one inch at a foot rest, held at Fort Chipewyan. Knowing nothing of the high jumping act, the Indian, the inspector relates, "just jumped over."

To Ameliorate Conditions

World Conference To Consider Price Slump Is Considered

Ambassador Andrew W. Mellon has asked the foreign office whether Britain believes in the world conference to consider the universal slump in commodity prices would ameliorate the general economic crisis.

The ambassador discussed the question with Sir John Simon, the British secretary of foreign affairs, but thus far nothing definite has developed. The ambassador's query remains under consideration by the British government.

There are about 18 distinct varieties of cheese; the 400 or more names given to cheeses are of local origin.

Damarcus, Syria, is said to be the oldest city in the world.

"I can't understand medicine. The doctor had ordered my wife to take a bath every day, and it is not because she is dirty."—Pages Gates, Tverdon.

## HISTORICAL GROUP OF OFFICERS REHEARSE FOR ALDERSHOT TATTOO

The brilliant display which will be witnessed this month, when the Aldershot Tattoo takes place in England, can be judged from the frequent photographs which the elaborate preparations will be a historical group of officers: Left to right: Zouave officer; Lord Nelson; Sir Francis Drake, and the Duke of Marlborough.

## Society Learns How Insulin Is Produced

Paper Read At Ottawa Meeting By Dr. Banting's Associate

Present methods of producing insulin, Canadian discovered diabetes remedy, in large quantities were described to the Royal Society of Canada in a paper by Dr. A. Scott and H. Parker, read by Dr. C. H. Best, Toronto associate of Dr. F. G. Banting.

Newest laboratory practice resulting from long research enables production of 2,000 units of insulin from one kilogram of pancreas, a gland-secreting digestive fluid, the paper said.

The custom of naming craters and other objects on the moon after famous astronomers was begun by the seventeenth century astronomer, Riccioli.

Harry: "Polished" woman, Mrs. Stinkoff, don't you think?"  
Beats: "Very. Everything she says critics reflection on someone."
